Organizational Chart

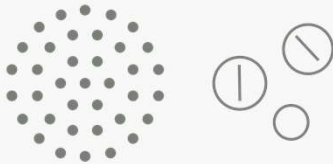

Site Leadership Team

Price Competitiveness in Manufacturing Operations

BULK PRODUCTION

- Focus on difficult to make
 - modified release
 - narcotics
- Via
 - pellet manufacturing
 - dry / wet / melt granulation
 - tableting and coating

PACKAGING

- Focus on difficult to pack products
 - blister packaging with special foils e.g. Alu//Alu, PP, Aclar
 - unit dose printing
 - packaging of potent drugs
- Via
 - high speed lines for big order quantities
 - quick change over lines for small to mid-size quantity
 - high automation
- Serialization and aggregation for countries around the world
- Batch release according to customer wishes
- Transport under GDP and in full responsibility of Acino

Our Oral Solid Dosage Center of Excellence

Since many decades Acino has been manufacturing pharmaceuticals. With many successful in-house developments, we have gained in-depth knowledge in bringing products from development to commercialization and extended our expertise in oral solid dosage forms by constantly optimizing and improving our processes.

Liesberg Quality Control

Our brand new Quality Control laboratories meet and exceed the highest quality standards and requirements. We have know-how, technology and facilities to support you achieving your projects goals. Continuously investment in our equipment with the latest technologies constantly increases our capabilities.

Our Packaging and Logistic Site in Pfeffingerring

At our Swiss packaging and logistics site in Pfeffingerring we are offering primary and secondary packaging of oral solid dosage forms up to OEB 3b and warehousing. This site is equipped with a high-speed packaging line able to pack 500 blisters per minute ensuring scale packaging for bigger volumes running under highest Acino quality standards.
